Professional Summary

Information Technology leader with **14+ years** driving digital transformation across **nearshore environments** (Brazil, India, South Africa). Specialized in building high-performance agile teams, optimizing data architectures processing **80M+ daily transactions**, and implementing **DevSecOps frameworks** ensuring PCI-DSS/LGPD compliance in fintech/payment systems.

Proven track record of accelerating product delivery by **60%** through CI/CD optimization, reducing critical vulnerabilities by **90%**, and leading cross-functional squads of **12+ engineers** across 3 time zones.

Core Competencies

• **Agile Team Leadership**: Leading nearshore squads in Data Engineering, ETL, and Cybersecurity to accelerate delivery from quarterly to monthly releases.

• **Data Engineering & Architecture**: Optimizing Databricks, Pentaho ETL, Apache Spark pipelines processing R$ 500M+ monthly revenue with 99.8% accuracy.

• **DevSecOps & Compliance**: Implementing security frameworks (Veracode, Rapid7) ensuring PCI-DSS, LGPD, BACEN compliance with zero audit findings.

• **Observability & Monitoring**: Datadog/Dynatrace certified for high-availability systems monitoring, reducing MTTR by 45%.

• **Full-Stack Development**: .Net, Java, Angular, OutSystems, Salesforce with focus on scalable, data-driven solutions.

• **AI-Powered Workflows**: Leveraging GitHub Copilot, ChatGPT, and Datadog AI to optimize development productivity.

Professional Experience

Serasa Experian | São Carlos, Brazil (Hybrid Remote)

IT Coordinator – M&A Flexpag | Payments, Data Engineering & Cybersecurity

Dec 2024 – Aug 2025 (9 months)

• Led **3 cross-functional squads (12 engineers across Brazil/India)** optimizing Databricks data architecture, reducing ETL processing time by **40%** while handling **80M+ daily transactions** with **99.8% accuracy**.

• Spearheaded **cybersecurity transformation**: built DevSecOps framework from scratch using Veracode/Rapid7, reducing critical vulnerabilities from **47 to 3 in 6 months** while ensuring **PCI-DSS and LGPD compliance**.

• Optimized **Pentaho ETL billing flows**, ensuring **R$ 500M+ monthly revenue reconciliation** for BACEN/FEBRABAN regulatory reporting with **zero audit findings**.

• Accelerated data product delivery from **quarterly to monthly releases** through CI/CD pipeline implementation, reducing deployment time by **60%**.

• Managed distributed nearshore teams across **3 time zones (UTC-3, UTC+5:30)**, implementing async communication protocols that increased squad productivity by **25%**.

IT Specialist – Agile Coach

Mar 2024 – Nov 2024 (9 months)

• Disseminated agile methodologies across **4 business units (HR, Legal, Sales, Finance)**, coaching **8+ squads** and boosting sprint velocity by **35%**.

• Engineered strategic roadmaps for scalable solutions, ensuring alignment between business OKRs and engineering delivery capacity through **DORA metrics** (Deployment Frequency, Lead Time, MTTR).

• Facilitated **Scrum of Scrums** ceremonies for cross-BU dependencies, reducing inter-squad blockers by **50%**.

• Implemented **Figma-to-Code handoff processes**, improving design-engineering fidelity and reducing rework by **40%**.

Senior Systems Analyst | Full-Stack Developer & Observability Lead

Mar 2016 – Apr 2021 (5 years, 2 months)

• Developed and maintained **core billing and CRM systems** using **Java (Spring), Angular, SQL Server/Postgres**, serving **10M+ active users** with **99.95% uptime**.

• Led **observability program** using Dynatrace/Datadog, implementing **Real User Monitoring (RUM)** and **APM traces**, reducing incident MTTR by **45%** through proactive alerting.

• Conducted **Root Cause Analysis (RCA)** for P1 incidents, documenting **50+ post-mortems** in Confluence, creating knowledge base that reduced repeat incidents by **60%**.

• Acted as **Technical Product Owner** for Salesforce/OutSystems integrations, translating business requirements into **120+ user stories** delivered across 15 sprints.

Amdocs | São Carlos, Brazil

Senior Business Operations Analyst | Unix/Oracle DBA

Jul 2013 – Mar 2016 (2 years, 9 months)

• Ensured **99.9% uptime** for high-criticality Telco billing systems processing **5M+ daily transactions** across Solaris/AIX environments.

• Developed **Shell Script and PL/SQL automation routines**, reducing manual DB maintenance tasks by **70%** and preventing **15+ major incidents** through proactive monitoring.

• Administered **Tuxedo/Weblogic middleware** and **CRM Clarify 12**, ensuring SLA compliance for **50+ incident tickets/month** with average resolution time of **4 hours**.

Certifications

• **Datadog Dashboards & Monitors** – Datadog (Oct 2025)
• **Yellow Belt Six Sigma** – Process Improvement & Lean Methodologies (2023)
• **Agile Coach Recognition** – Serasa Experian Customer Experience & Technology Area (2023)

Education

- **Postgraduate in Web Development** (Java, Full-Stack) – Federal University of São Carlos, UFSCar (2018)
- **Bachelor of Engineering** (Electrical Engineering) – UNICEP Central Paulista University Center (2005–2011)

Technical Skills

Data Engineering: Databricks, Apache Spark, Pentaho ETL, Python, SQL (Advanced), APIs REST
Development: Java (Spring), .Net, Angular, OutSystems, Salesforce, JavaScript/TypeScript
DevSecOps: Veracode, Rapid7, PCI-DSS, LGPD, CI/CD (Jenkins, GitHub Actions)
Observability: Datadog (Certified), Dynatrace, APM, RUM, DORA Metrics
Databases: PostgreSQL, SQL Server, OracleDB, PL/SQL
Agile Tools: JIRA, Azure Boards, Confluence, Figma, ServiceNow
Infrastructure: Unix (Solaris/AIX), Shell Scripting, Docker, Kubernetes (fundamentals)
AI Tools: GitHub Copilot, ChatGPT, Datadog AI for operational insights

Languages

- **Portuguese**: Native
- **English**: Fluent (Professional Working Proficiency)
- **Spanish**: Basic

Key Achievements

✓ Reduced critical vulnerabilities by **90%** (47→3) in 6 months while maintaining PCI-DSS compliance
✓ Optimized ETL pipelines to process **80M+ daily transactions** with **40% faster execution**
✓ Led nearshore teams across **3 time zones**, increasing productivity by **25%**
✓ Achieved **zero audit findings** in BACEN/FEBRABAN regulatory reviews for R$ 500M+ monthly reconciliations
✓ Accelerated product delivery cycles from **quarterly to monthly** through CI/CD automation
✓ Reduced incident MTTR by **45%** through Datadog observability implementation
