Certifications

DataDog - Tagging Best Practices
DataDog - Dashboards
Certified Angular Developer
Certified JavaScript Developer
Datadog - Metrics

Honors-Awards

Knowledge transfer and modernization
Recognition for agile work to support IT systems (ongoing)
Agile Coach

Publications

A block programming interface for educational mobile robots
Retrofit of reclosers in electric power grids

Wesley Gomes da Silva

Agile Delivery Manager | AI-Driven Software Delivery | Tech heavy |
Digital Products & Distributed Teams
São Carlos, São Paulo, Brazil

Summary

10+ years of experience building mission-critical systems and leading distributed, high-performance teams at global companies such as Experian and Amdocs.

I specialize in delivery projects with remote and multicultural engineering teams, connecting business strategy with technical execution to deliver scalable digital products powered by Observability, DevSecOps, and AI-driven delivery.

Core Expertise & Impact:

- **Global & Distributed Leadership:** Led remote and nearshore squads across Brazil, India, and South Africa, optimizing asynchronous workflows and global delivery hubs.
- **AI-Powered Engineering:** Leveraging GitHub Copilot and AI-driven workspaces to streamline workflows and accelerate the SDLC by up to 45%.
- **Data & Financial Systems at Scale:** Orchestrating data pipelines (Databricks, Spark) supporting reconciliation of R\$500M+ monthly with high reliability.
- **Security & Reliability:** Leading secure systems, reducing critical vulnerabilities by 93% while ensuring compliance with PCI-DSS and LGPD. Okta and AWS pentest.

Let's Connect

I'm open to discussing:

- Global engineering leadership & Nearshore models.
- AI-driven engineering environments.
- Strategic digital product delivery.

Experience

Serasa Experian

10 years 3 months

IT Coordinator | M&A Startup Fintech Flexpag | Payments and Data
November 2024 - Present (1 year 7 months)

Remote São Carlos, Blumenau, Recife

Architecture Optimization: Led Data squads in modernizing the architecture and development operations using Databricks, ensuring higher processing robustness.

2 squads, 4 people per squad.

Delivery Acceleration: Significantly reduced the time-to-market for analytical products, fostering real-time, data-driven strategic decision-making.

Technical Scalability: Implemented structural improvements that enabled sustainable platform growth in response to increasing data volumes.

Payments & ETL:

Acquiring Expertise: Managed the ETL squad with a focus on complex acquiring and sub-acquiring financial processes.

Financial Efficiency: Optimized billing workflows and revenue reconciliation via Pentaho and APIs, ensuring 100% precision in financial transactions.

Regulatory Compliance: Guaranteed strict compliance in regulatory reporting for governing bodies such as BACEN and FEBRABAN.

Cybersecurity & DevSecOps:

Zero-to-One Framework: Fully implemented the DevSecOps framework and vulnerability management program using Veracode and Rapid7 from the ground up.

SDLC Security: Proactively integrated security layers throughout the Software Development Life Cycle, hardening infrastructure and sensitive data against external threats.

Data Protection Compliance: Ensured maximum protection for sensitive data in full adherence to international PCI-DSS standards.

Agile Delivery Manager for Business Units HR, Legal, Customer Service, Sales, Billing

April 2021 - November 2024 (3 years 8 months)

Delivery Metrics Management: Implemented and monitored KPIs and efficiency metrics (Velocity, Burndown, Cycle Time), generating data-driven insights for continuous team performance improvement. aligned with our stakeholders on London and USA.

5 squads, 7 people per squad.

SDLC Optimization: Technical leadership in disseminating Agile methodologies across Technology and Data squads, focusing on reducing development bottlenecks and increasing productivity through optimized workflows.

Governance & Roadmaps: Built strategic roadmaps for scalable solutions, ensuring technical alignment between business objectives (OKRs) and engineering delivery capacity.

Design-Engineering Interface: Proactive collaboration using Figma to ensure technical and functional fidelity during the hand-off from prototypes to front-end development.

Cross-BU Synergy: Managed technical interdependencies across multiple business units (Legal, Finance, Sales), ensuring systemic integrity and continuous value delivery in hybrid environments.

Full Stack Developer – Billing ITIL/Observability

March 2016 - April 2021 (5 years 2 months)

São Carlos e Região, Brasil

End-to-End Development: Acted in the full development lifecycle of core Billing and CRM systems, utilizing Java and Angular to deliver scalable, high-availability solutions.

Data Engineering & Backend: Designed and maintained complex databases, ensuring data integrity and high performance for large volumes of financial transactions.

Stability & Observability: Technical lead for mission-critical system support, utilizing Dynatrace and Datadog for proactive monitoring and incident reduction through Root Cause Analysis (RCA).

Architecture & Requirements: Translated business needs into high-fidelity technical specifications, ensuring solutions were sustainable and aligned with corporate SLAs.

Technical Ecosystem: Integrated and evolved diverse platforms, including Salesforce, OutSystems, and .NET, navigating with agility between legacy and modern technologies.

Amdocs Studios

Technical Support Specialist

July 2013 - March 2016 (2 years 9 months)

São Carlos e Região, Brasil

Operational Stability & Automation: Deep expertise in Unix environments, developing Shell Script and PL/SQL routines to optimize OracleDB performance, resulting in stable environments and proactive failure reduction.

Incident Management Efficiency with India/EUA Shift: Proficiency in platforms such as Remedy and CRM Clarify 12, ensuring agile and effective support for relationship platforms, directly impacting end-user satisfaction.

Critical Middleware Support: Administration and support of vital components such as Tuxedo and Weblogic, ensuring seamless communication between essential systems and high transactional performance.

Strategic Partnership: Acting as a bridge between technology and business goals, transforming technical challenges into solutions that drive corporate objectives.

Core Competencies:

Mission-Critical & Legacy Systems Support

Automation with Shell Script & PL/SQL | OracleDB Administration

CRM Infrastructure & Middleware Support (Tuxedo/Weblogic)

Continuous Improvement & Strategic Stakeholder Management

XBot

2 years 9 months

Business Development Manager

November 2010 - July 2013 (2 years 9 months)

São Carlos

Focus:

Technological education with robots and programming logic.

Energy systems and utilities.

Security and simulation systems.

12 Sales and Partner teams managed across Brazil.

Programming language professor

January 2011 - December 2011 (1 year)

Programming language professor

Bernardin Consultants (www.bernardin.com.br)

International Consultant (France Contractor)

January 2010 - December 2010 (1 year)

Cotia, SP

A Market Development and International Relations Specialist focused on introducing high-tech equipment to the Brazilian market (Contractor from France). My role involves acting as the bridge between foreign investors and technologies and the local market, leading the end-to-end process from prospecting and feasibility analysis to negotiation and closing new business deals.

I have developed commercial strategies for cutting-edge technologies across various sectors, including:

Security & Defense: Introducing infrared microchip technologies from French companies Ulis and Sofradir.

Precision Industry: Creating business opportunities for automatic dosing machines for flavors and fragrances from the Swiss company Contexa.

Aviation & Military: Analyzing the market for high-performance specialty connectors from the Swiss company Lemco.

My objective is to translate the potential of innovative technologies into tangible commercial results and long-lasting strategic partnerships.

Sidertec Estruturas Metalicas (www.sidertec.com.br)

Analyst informatics

July 2009 - March 2010 (9 months)

São Carlos, SP

An accomplished IT professional with a track record of managing robust technological infrastructures to ensure business continuity and drive operational efficiency. I directed the end-to-end administration of the IT landscape, creating a highly available and secure environment.

Elektro Eletricidade e Serviços Ltda. (www.elektro.com.br)

Trainee Maintenance Engineering Substation and Power Transmission Lines

January 2009 - December 2009 (1 year)

Maintenance Planning and Control (MPC)

Strategic Planning: Develops corrective, preventive, and predictive maintenance plans for high-voltage assets (Circuit Breakers, Transformers, Switches, Reclosers) to maximize asset lifespan and ensure the reliability of the electrical power system.

Service Management: Controls the execution of maintenance services in substations and transmission lines, including the management and oversight of third-party contracts to guarantee quality and adherence to technical standards.

Team Management: Provides support to the management of field teams (Mechanical, Electronics, and Transmission Lines) to optimize resource allocation and activity execution.

Tools: Proficient in SAP (PM Module) for work order management and planning, and the Scada Eclipse system for remote monitoring and control.

Compliance and Safety (NR10)

Certified NR10 Instructor: Serves as an instructor for the NR10 course (Brazilian safety standard for electrical work), responsible for training and retraining employees to ensure regulatory compliance and the safe execution of all activities in electrical installations.

Specific Technical Knowledge

Automation & Networks: Experienced in substation digitalization and telemetry based on the IEC 61850 standard.

Protection Systems: Knowledgeable in Lightning Protection Systems (SPDA/LPS).

Diagnostics: Performs tests and measurements of electrical quantities for equipment diagnostics and commissioning.

Tecumseh Products Company

Trainee Engineering for Industrial Maintenance

January 2005 - December 2008 (4 years)

São Carlos, SP

Analyst maintenance specifying materials and qualifying for restocking and corrective maintenance, preventive and predictive. Selection and qualification of suppliers. Control and scheduling preventive and predictive maintenance. Purchases of materials and technical equipment. Administrative expertise in Oracle software.

Education

Centro Universitário Central Paulista

Bacharelado em Engenharia, Recloser Retrofit and Modernization Project for Power Transmission Systems · (2005 - 2011)

Universidade Federal de São Carlos

Graduate Certificate in Web Development, Specialization in Java and Databases · (2018 - 2018)

Senai São Paulo

Electrical Maintenance, Technician · (1999 - 2000)
